Final project proposal

As of now, I am proposing to do a restaurant review site for local cities.  The purpose of this site is to let users/customers know where all the best restaurants to eat out.  The idea is to gather as much reviews from customers as possible to let future customers know the food, the service, and the experience they can get from some of the local restaurants.  Food is one if not the most important thing that we need day to day and with so many options to choose from, it is important that customers get the most for their money.  From Seattle, to Bellevue, to Renton, and down to Federal Ways, there are many options for customers to choose.

I have always love eating and willing to try new restaurant and tend to recommend to friends/families if they ask for my recommendation of where and what to eat or to try out.  There are different type of restaurants such as family, social outing, and dating/romantic.  By providing accurate reviews to the users/customers so that they get good and service.
